iLAB

Software Quality Assurance & Testing Services

iLAB's Software Quality Assurance services provide customized solutions tailored to meet the unique needs of each client, ensuring that software products are of the highest quality, reliable, and user-friendly.

iLAB's Software Quality Assurance (SQA) services cater to different stages of the software development life cycle, ensuring that software products meet the highest quality standards. iLAB's involvement in the project can range from the start of requirement definition to after development has already started. The earlier iLAB is involved in the project, the more comprehensive the SQA services can be.

At iLAB, our core competencies of people, process, and technology allow us to deliver high-quality software development services that meet our clients' exact requirements.

• **People**: Our team of experts has deep knowledge and experience in software quality assurance.
• **Process**: We follow industry-standard practices and our proprietary iTEST methodology to ensure the highest level of quality.
• **Technology**: We use the latest tools and technologies to provide comprehensive software quality assurance services.

Customizable Solutions

SOFTWARE TESTING → COMPREHENSIVE SOFTWARE QUALITY ASSURANCE →

User Acceptance Testing

User Acceptance Testing (UAT) at iLAB focuses on end-user validation of software product. UAT is ideal for less complex projects or when clients require tarted testing for specific user requirements and expectations.

Complete Software Testing

iLAB's Complete Software Testing offers a comprehensive suite of services, covering functional, performance, security, usability, and compatibility aspects, ensuring thorough validation of software solutions from start to finish.

Managed Software Testing

Managed Software Testing at iLAB takes on the responsibility of managing the entire testing process on behalf of the client and includes planning, executing, monitoring, and controlling all testing activities, ensuring timely, on-budget delivery of high-quality software.

Total Quality Assurance

Total Quality Assurance is the only option for comprehensive quality assurance and testing. iLAB provides end-to-end quality assurance solutions for the most complex projects. This involves addressing all aspects of software development, from requirements gathering and design to implementation and deployment, guaranteeing the highest quality products.

Support Services

Workforce Solutions

Our Workforce Solutions services offer robust IT Staffing and Strategic Consulting, enabling organizations to build, manage, and maintain high-performance teams with skilled professionals for short-term or long-term projects, optimized workforce strategies, and dedicated ongoing support.

Testing Optimization

We focus on boosting software testing efficiency and effectiveness by streamlining processes, implementing agile and waterfall methodologies, and incorporating advanced testing tools and technologies, ultimately leading to improved test outcomes and overall project success.

Training

Our Training services offer customized training solutions for individuals or organizations to enhance their skills and knowledge in software quality assurance. Our Training Center is virtual or can come to your business on location. We can help with skill gap training or career advancement.
